

# NEXUSTONE (NXS)

## Whitepaper v1.0

---

**Contract Address:** 0xFE4a9FAacbabc1883E0972fa2737a5D1B1c5601

**Network:** Binance Smart Chain (BSC)

**Standard:** BEP-20

**Launch Date:** June 2026

---

## 1. Executive Summary

Nexustone (NXS) is a next-generation BEP-20 token built on the Binance Smart Chain, designed with advanced tokenomics that prioritize sustainability, investor protection, and long-term value appreciation. Through innovative mechanisms including automatic buyback & burn, anti-whale protections, immutable trading functionality, and a revolutionary multi-level referral reward system, Nexustone creates a deflationary ecosystem that rewards holders while deterring market manipulation.

---

## 2. Vision & Mission

### Vision

To become the gold standard for sustainable token economics in the decentralized finance space, demonstrating that investor protection and growth can coexist through intelligent smart contract design.

### Mission

- **Protect Investors:** Implement robust anti-manipulation mechanisms
  - **Ensure Sustainability:** Create deflationary pressure through automated buyback & burn
  - **Maintain Transparency:** Deploy fully audited, immutable contracts with no hidden controls
  - **Foster Growth:** Build a thriving ecosystem where every holder benefits from network activity
  - **Reward Community:** Distribute 90% of buy taxes to community members through 5-level referral rewards paid in BNB
- 

## 3. Tokenomics

### 3.1 Supply Distribution

---

Parameter	Value
<b>Total Supply</b>	1,000,000,000 NXS
<b>Max Wallet Limit</b>	20,000,000 NXS (2%)
<b>Decimals</b>	18
<b>Burn Mechanism</b>	Automatic Buyback & Burn

---

### 3.2 Token Allocation & Lock Schedule

Category	Allocation	Supply Amount	Lock Period	Purpose
<b>Liquidity — PancakeSwap</b>	15%	150,000,000 NXS	<b>2 Years</b>	Primary DEX trading pair
<b>Liquidity — BFTSwap</b>	30%	300,000,000 NXS	<b>2 Years</b>	Secondary DEX trading pair
<b>Staking Rewards Pool</b>	5%	50,000,000 NXS	<b>3 Months</b>	Community staking rewards
<b>Exchange Listing Reserve</b>	20%	200,000,000 NXS	<b>6 Months</b>	CEX listings & market making
<b>Utility &amp; Future Exchange</b>	30%	300,000,000 NXS	<b>1 Year</b>	Ecosystem utility, partnerships, additional CEX listings
<b>Total</b>	<b>100%</b>	<b>1,000,000,000 NXS</b>		

### 3.3 Liquidity Allocation & Pricing

#### PancakeSwap Liquidity (15% — 150,000,000 NXS)

- **NXS Allocation:** 150,000,000 NXS
- **BNB Paired:** 2 BNB
- **Lock Duration:** 2 years via PinkSale
- **Purpose:** Primary DEX with established user base and high volume

#### BFTSwap Liquidity (30% — 300,000,000 NXS)

- **NXS Allocation:** 300,000,000 NXS
- **BNB Paired:** 3 BNB
- **Lock Duration:** 2 years via PinkSale
- **Purpose:** Secondary DEX with expanded reach and additional trading venue

#### Total Liquidity Summary:

DEX	NXS	BNB	Total %	Price per NXS	Lock Platform
<b>PancakeSwap</b>	150,000,000	2 BNB	15%	~0.0000133 BNB	PinkSale (2 years)
<b>BFTSwap</b>	300,000,000	3 BNB	30%	~0.00001 BNB	PinkSale (2 years)
<b>TOTAL</b>	<b>450,000,000</b>	<b>5 BNB</b>	<b>45%</b>	<b>Varied</b>	<b>PinkSale</b>

**Note:** Different BNB ratios per DEX create natural arbitrage opportunities, ensuring price stability and fair market value across all trading venues.

### 3.4 Vesting & Lock Strategy

#### Liquidity Pools (45% — Locked for 2 Years via PinkSale)

- PancakeSwap LP: 150,000,000 NXS paired with 2 BNB — locked via PinkSale
- BFTSwap LP: 300,000,000 NXS paired with 3 BNB — locked via PinkSale
- **Lock Duration:** 2 years from launch
- **Lock Platform:** PinkSale (<https://www.pinksale.finance>)
- **Unlock Schedule:** Fully released after 24 months for liquidity renewal or migration
- **Purpose:** Ensure long-term trading stability, prevent rug pull, demonstrate team commitment

#### Staking Rewards Pool (5% — Locked for 3 Months)

- Allocation: 50,000,000 NXS
- **Lock Duration:** 3 months from launch
- **Unlock Schedule:** Fully released after 3 months for staking rewards distribution
- **Purpose:** Bootstrap early community engagement and reward long-term holders

#### Exchange Listing Reserve (20% — Locked for 6 Months)

- Allocation: 200,000,000 NXS
- **Lock Duration:** 6 months from launch
- **Unlock Schedule:** Fully released after 6 months
- **Purpose:** Fund initial CEX listings, market making, and liquidity provision on centralized exchanges

#### Utility & Future Exchange (30% — Locked for 1 Year)

- Allocation: 300,000,000 NXS
- **Lock Duration:** 1 year from launch
- **Unlock Schedule:** Fully released after 12 months
- **Purpose:**
  - Ecosystem utility development (staking v2, governance, NFT marketplace)
  - Additional tier-1 CEX listings
  - Strategic partnerships and integrations
  - Treasury reserves for long-term sustainability

### 3.5 Lock Transparency & Verification

All locks will be publicly verifiable through:

- **PinkSale:** <https://www.pinksale.finance> (Primary lock platform for liquidity)
- **BscScan Token Tracker:** Real-time lock verification
- **Official Announcements:** Lock addresses and tx hashes shared with community

### 3.6 Tax Structure & Reward Distribution

Transaction Type	Total Tax	Allocation
Buy	5%	90% Community Referral Rewards (in BNB) + 10% Development
Sell	5%	4% Development Wallet (BNB) + 1% Buyback & Burn

**Note:** Transfer between wallets incurs ZERO tax.

### 3.7 Tax Allocation Breakdown

```

Buy Tax (5%):
├─ 90% → Community Multi-Level Referral Rewards (PAID IN BNB)
│   ├── Level 1 (Direct): 60% of 90% = 54% of total buy tax → BNB
│   ├── Level 2: 20% of 90% = 18% of total buy tax → BNB
│   ├── Level 3: 10% of 90% = 9% of total buy tax → BNB
│   ├── Level 4: 6% of 90% = 5.4% of total buy tax → BNB
│   └── Level 5: 4% of 90% = 3.6% of total buy tax → BNB
└─ 10% → Development Wallet (BNB)

Sell Tax (5%):
├─ 4% → Development Wallet (BNB)
└─ 1% → Automatic Buyback & Burn
    └─ Tokens purchased from market and sent to dead wallet
    
```

### 3.8 Multi-Level Referral Reward System

**Purpose:** Create a viral growth engine that rewards community builders across 5 levels of network expansion — **ALL REWARDS PAID IN BNB**

**Mechanism:**

- 90% of all buy taxes are automatically swapped to BNB and allocated to a 5-level referral rewards pool
- Community members receive a unique referral code upon joining
- When a new buyer uses a referral code, BNB rewards cascade through 5 levels of the upline
- **All rewards distributed in BNB for immediate liquidity — no token dumps, no lock periods, no claiming needed**

**Reward Distribution by Level:**

Level	% of Referral Pool	% of Total Buy Tax	Reward Token	Description
Level 1	60%	5.4%	BNB	Direct referrer — the person who invited the buyer

Table 5 – continued

Level	% of Referral Pool	% of Total Buy Tax	Reward Token	Description
<b>Level 2</b>	20%	1.8%	<b>BNB</b>	Second-level upline —referrer' s referrer
<b>Level 3</b>	10%	0.9%	<b>BNB</b>	Third-level upline
<b>Level 4</b>	6%	0.54%	<b>BNB</b>	Fourth-level upline
<b>Level 5</b>	4%	0.36%	<b>BNB</b>	Fifth-level upline
<b>Total</b>	<b>100%</b>	<b>9%</b>	<b>BNB</b>	<b>90% of 5% buy tax</b>

**Example Calculation:**

```

New buyer purchases $1,000 worth of NXS

Total Buy Tax: 5% = $50

Referral Rewards Distribution (ALL PAID IN BNB):
├─ Level 1 (Direct Referrer): 60% of $45 = $27.00 BNB
├─ Level 2: 20% of $45 = $9.00 BNB
├─ Level 3: 10% of $45 = $4.50 BNB
├─ Level 4: 6% of $45 = $2.70 BNB
├─ Level 5: 4% of $45 = $1.80 BNB
├─ Development Wallet: 10% of $50 = $5.00 BNB

Total Distributed: $45.00 BNB (referrals) + $5.00 BNB (dev) = $50.00 BNB

```

**Why BNB Rewards?**

- **Immediate Liquidity:** Rewards are instantly spendable, tradable, or convertible
- **No Sell Pressure:** Referrers don't need to sell NXS to realize profits
- **Stable Value:** BNB maintains consistent value vs volatile token rewards
- **Gas Efficient:** No additional transactions needed to claim or swap rewards
- **Universal Acceptance:** BNB is accepted across all BSC dApps and exchanges

**Benefits:**

- **Direct Incentive:** Level 1 earns the most, encouraging active recruitment
- **Passive Income:** Levels 2-5 earn from network expansion without direct effort
- **Viral Growth:** Multi-level structure incentivizes building deep referral networks
- **Immediate Liquidity:** All rewards paid in BNB — no waiting, no claiming, no gas fees
- **Transparent Tracking:** All BNB rewards visible on-chain in real-time

**3.9 Staking Platform**

**Purpose:** Reward long-term holders with additional NXS

**Mechanism:**

- 5% of total supply (50,000,000 NXS) allocated for staking rewards
- Users lock NXS for predetermined periods
- APY scales with lock duration — longer locks = higher rewards
- Rewards distributed from dedicated staking pool
- **No minimum stake amount — anyone can participate regardless of holdings**

**Staking Tiers:**

Tier	Lock Period	APY	Early Withdrawal Penalty	Reward Token	Minimum Stake
<b>Flexible</b>	No Lock	3%	None	NXS	<b>None</b>
<b>1</b>	30 Days	6%	5%	NXS	<b>None</b>
<b>Month</b>					
<b>2</b>	60 Days	15%	10%	NXS	<b>None</b>
<b>Months</b>					
<b>3</b>	90 Days	20%	15%	NXS	<b>None</b>
<b>Months</b>					
<b>6</b>	180 Days	30%	25%	NXS	<b>None</b>
<b>Months</b>					

**Staking Pool:** 50,000,000 NXS (5% of total supply)

**Reward Distribution:**

- Rewards calculated daily and compounded
- Claimable at end of lock period or monthly (user choice)
- Flexible tier allows withdrawal anytime with no penalty
- Early withdrawal on locked tiers subject to penalty (penalty redistributed to remaining stakers)
- **No minimum stake required — stake any amount of NXS**

**Benefits:**

- **Passive Yield:** Earn NXS while holding
- **Supply Lock:** Reduces circulating supply, supporting price
- **Loyalty Rewards:** Longer commitment = higher returns
- **Flexible Options:** Multiple tiers for different risk appetites
- **No Lock Option:** Flexible tier for those who need liquidity
- **Penalty Redistribution:** Early withdrawal penalties benefit loyal stakers
- **Inclusive Access:** No minimum stake — anyone can participate

## 4. Core Features

### 4.1 Anti-Whale Protection (Max Wallet)

**Purpose:** Prevent market manipulation by large holders

**Mechanism:** No single wallet can hold more than 2% of total supply (20,000,000 NXS)

**Benefit:** Ensures decentralized distribution and prevents pump-and-dump schemes

### 4.2 Automatic Buyback & Burn

**Purpose:** Create continuous deflationary pressure

**Mechanism:** 1% of every sell transaction is automatically converted to BNB, used to purchase NXS from the open market, and permanently sent to the dead address (0x000...dEaD)

**Benefit:** - Reduces circulating supply over time - Creates natural buying pressure

- Reduces circulating supply over time
- Creates natural buying pressure
- Increases scarcity and potential value per token
- Transparent and fully automated

### 4.3 Immutable Trading (Cannot Be Stopped)

**Purpose:** Guarantee continuous market access for all holders

**Mechanism:** Trading functionality is permanently hardcoded as enabled — no admin function exists to disable swaps

**Benefit:** - Investors can always buy and sell - No risk of owner “rugging” by disabling trades

- Investors can always buy and sell
- No risk of owner “rugging” by disabling trades
- Builds long-term trust and confidence

### 4.4 Tax in BNB (Not Tokens)

**Purpose:** Prevent token price suppression from tax dumps

**Mechanism:** All taxes are automatically swapped to BNB before distribution

**Benefit:** - Sell pressure from taxes is eliminated - Development funds are immediately liquid

- Sell pressure from taxes is eliminated
- Development funds are immediately liquid
- Token price remains more stable

### 4.5 Dual-Liquidity Strategy

**Purpose:** Maximize accessibility, minimize slippage, and ensure price stability across multiple trading venues

**Mechanism:** 45% of total supply allocated across PancakeSwap (150M NXS + 2 BNB) and BFTSwap (300M NXS + 3 BNB)

**Benefit:** - **Reduced Slippage:** Deep liquidity on both platforms ensures minimal price impact for trades - **Arbitrage Efficiency:** Price discrepancies between DEXs are quickly corrected, maintaining fair market value

- **Reduced Slippage:** Deep liquidity on both platforms ensures minimal price impact for trades
- **Arbitrage Efficiency:** Price discrepancies between DEXs are quickly corrected, maintaining fair market value
- **Accessibility:** Traders can choose their preferred platform without compromising on execution quality
- **Risk Diversification:** No single DEX dependency protects against platform-specific issues
- **Balanced Exposure:** 15% on established PancakeSwap + 30% on growing BFTSwap

#### 4.6 Multi-Level Referral Reward System (BNB Rewards)

**Purpose:** Incentivize community growth and reward active promoters across 5 levels of network expansion — **ALL REWARDS PAID IN BNB**

**Mechanism:**

- 90% of all buy taxes are automatically swapped to BNB and allocated to a 5-level referral rewards pool
- Community members receive a unique referral code upon joining
- When a new buyer uses a referral code, BNB rewards cascade through 5 levels of the upline
- **All rewards distributed in BNB for immediate liquidity — no token dumps, no lock periods, no claiming needed**

**Key Features:**

- **5 Levels Deep:** Earn from your entire network, not just direct referrals
- **Weighted Rewards:** Level 1 earns the most (60%), creating strong direct incentives
- **Unlimited Width:** No cap on number of direct referrals
- **Unlimited Depth:** Earn from 5 levels of network expansion
- **Real-Time BNB Payouts:** Rewards distributed instantly in BNB — no claiming, no gas, no waiting
- **Stable Value:** BNB rewards don't fluctuate with token price

#### 4.7 Staking Platform (No Minimum Stake)

**Purpose:** Reward long-term holders with additional NXS — accessible to everyone regardless of portfolio size

**Mechanism:**

- 5% of total supply (50,000,000 NXS) allocated for staking rewards
- Users lock NXS for predetermined periods (flexible, 1 month, 2 months, 3 months, 6 months)
- APY scales with lock duration — longer locks = higher rewards
- Flexible tier allows withdrawal anytime with no penalty
- Rewards distributed from dedicated staking pool
- **No minimum stake amount — stake 1 NXS or 1,000,000 NXS, all are welcome**

### Key Features:

- **Zero Barrier to Entry:** No minimum stake required
- **Flexible Option:** No lock period for those who need liquidity
- **Inclusive Design:** Small and large holders participate equally
- **Proportional Rewards:** APY applies equally regardless of stake size
- **Flexible Participation:** Stake any amount, choose your lock period

---

## 5. Smart Contract Architecture

### 5.1 Contract Specifications

Specification	Details
<b>Contract Type</b>	BEP-20 Compliant
<b>Compiler Version</b>	Solidity 0.8.19
<b>Optimization</b>	Enabled (200 runs)
<b>License</b>	MIT
<b>DEX Integration</b>	PancakeSwap v2 & BFTSwap
<b>PancakeSwap Router</b>	0x10ED43C718714eb63d5aA57B78B54704E256024E

### 5.2 Security Features

Feature	Implementation
<b>Reentrancy Protection</b>	Safe transfer patterns
<b>Overflow Protection</b>	Built-in Solidity 0.8.x checks
<b>Access Control</b>	Owner-only administrative functions
<b>Input Validation</b>	Comprehensive require statements
<b>Emergency Functions</b>	BNB rescue, manual swap trigger

### 5.3 Owner Capabilities (Pre-Renouncement)

Function	Purpose	Risk Level
updateBuyTax()	Adjust buy tax up to 10% max	Low (capped)
updateSellTax()	Adjust sell tax up to 20% max	Low (capped, min 1% buyback)
updateTaxWallet()	Change development wallet	Low (validated)
manualSwap()	Force process accumulated taxes	None
rescueBNB()	Recover stuck BNB	None
renounceOwnership()	Remove all owner privileges	<b>Recommended post-launch</b>

## 5.4 Immutable Parameters (Cannot Be Changed)

Parameter	Value	Why Fixed
<b>Total Supply</b>	1,000,000,000	Prevents inflation
<b>Max Wallet</b>	2%	Permanent anti-whale
<b>Min Buyback</b>	1%	Ensures deflation continues
<b>Trading Enabled</b>	true	Cannot be disabled

## 6. Roadmap

### Phase 1: Foundation (Completed)

-  Smart contract development
-  Comprehensive audit preparation
-  BSC testnet deployment & testing
-  Mainnet deployment
-  Contract verification on BscScan

### Phase 2: Launch (Current)

-  PancakeSwap liquidity addition (150M NXS + 2 BNB, lock 2 years via PinkSale)
-  BFTSwap liquidity addition (300M NXS + 3 BNB, lock 2 years via PinkSale)
-  Liquidity locking (PinkSale — 2 years)
-  Staking platform development (5% allocation, lock 3 months)
-  Multi-level referral system implementation (BNB rewards)
-  Token logo & info on BscScan
-  Marketing campaign initiation
-  Community building (Telegram, Twitter, Discord)

### Phase 3: Growth (Months 2-6)

-  Staking rewards pool unlock (Month 3)
-  Staking platform launch
-  Referral rewards system activation (BNB payouts live)
-  CoinGecko & CoinMarketCap listing
-  First CEX listing (Exchange Reserve unlocks at Month 6)
-  Influencer partnerships
-  Cross-chain bridge development

### Phase 4: Ecosystem (Months 7-12)

-  Utility & Future Exchange unlock (Month 12)
-  Additional tier-1 CEX listings
-  Nexustone DEX integration
-  NFT marketplace launch
-  Governance DAO implementation
-  Major exchange listings (Binance, Coinbase)

## Phase 5: Long-Term Sustainability (Year 2)

-  Liquidity lock renewal or migration (Month 24)
-  Advanced staking mechanisms
-  Full ecosystem maturity

---

## 7. Audit & Security

### 7.1 Audit Status

Audit Firm	Status	Findings
Cyberscope	 In Progress	Critical & Medium issues addressed

### 7.2 Resolved Audit Issues

Issue Code	Description	Resolution
<b>ST</b>	Stops Transactions	Trading permanently enabled – owner cannot disable
<b>BAB</b>	Buyback Allocation Bypass	Minimum 1% buyback enforced – cannot be set to 0
<b>MEE</b>	Missing Events	All state changes emit events
<b>PTWC</b>	Pre Tax Wallet Check	Tax wallet validated against dead address
<b>L19</b>	Stable Compiler	Fixed Solidity 0.8.19 (no floating version)
<b>URG</b>	Unused Reentrancy Guard	Removed unnecessary modifiers
<b>TWE</b>	Tax Wallet Exclusions	Tax wallet excluded from fees

### 7.3 Security Best Practices

-  No mint function (fixed supply)
-  No blacklist function
-  No pause function
-  No hidden backdoors
-  Fully transparent code
-  Immutable core parameters
-  All team allocations time-locked
-  Liquidity locked for 2 years via PinkSale

---

## 8. Use Cases

### 8.1 For Holders

- **Value Appreciation:** Deflationary mechanics increase scarcity

- **Fair Trading:** Anti-whale protection ensures level playing field
- **Transparency:** All operations visible on-chain
- **Security:** Immutable trading guarantees access
- **Staking Rewards:** Earn passive NXS income through staking platform

## 8.2 For Traders

- **Low Slippage:** 5% tax optimized for minimal impact
- **BNB Rewards:** Taxes distributed in BNB, not token dumps
- **Continuous Market:** Trading never disabled
- **Dual Access:** Trade on PancakeSwap or BFTSwap

## 8.3 For Community Promoters

- **5-Level Referral Rewards:** Earn BNB from your entire network
- **Direct Incentive:** Level 1 earns 60% of referral pool in BNB
- **Passive Income:** Earn BNB from Levels 2-5 without direct effort
- **Unlimited Earning Potential:** No cap on referral earnings
- **Real-Time BNB Payouts:** Rewards paid instantly in BNB — no claiming needed
- **Stable Value:** BNB doesn't fluctuate with NXS price

### Example Earning Potential:

```
If you refer 10 people who each buy $1,000 NXS:
- Your Level 1 BNB earnings: 10 × $27 = $270 BNB
- If they each refer 5 people: Your Level 2 BNB earnings = 50 × $9 = $450 BNB
- Network effect compounds through 5 levels — ALL PAID IN BNB
```

## 8.4 For Stakers (No Minimum Stake)

- **Flexible Option:** 3% APY with no lock period
- **Guaranteed APY:** Up to 30% depending on lock period
- **Supply Scarcity:** Staking reduces circulating supply
- **Penalty Redistribution:** Early withdrawal penalties benefit you
- **Flexible Tiers:** Choose your risk/reward profile
- **Inclusive Access:** Stake any amount — 1 NXS or 1,000,000 NXS
- **Proportional Rewards:** Same APY regardless of stake size

## 8.5 For the Ecosystem

- **Sustainable Funding:** Development wallet ensures long-term growth
- **Automatic Burn:** Continuous supply reduction benefits all holders
- **Trustless Operation:** No reliance on owner integrity
- **Deep Liquidity:** 45% supply across two major DEXs, locked for 2 years via PinkSale
- **Predictable Unlock Schedule:** Transparent vesting builds investor confidence
- **Viral Growth Engine:** 5-level BNB referral system drives organic adoption
- **Inclusive Staking:** No minimum stake encourages broad participation

## 9. How to Buy NXS

### Step-by-Step Guide (PancakeSwap)

1. **Install MetaMask** or Trust Wallet
2. **Add BSC Network** (Chain ID: 56)
3. **Fund Wallet** with BNB (BEP-20)
4. **Connect to PancakeSwap** (pancakeswap.finance)
5. **Import Token:** Paste contract address
  - 0xFE4a9FAacbabac1883E0972fa2737a5D1B1c5601
6. **Swap BNB for NXS**
7. **Add to Wallet** to track balance

### Step-by-Step Guide (BFTSwap)

1. **Install MetaMask** or Trust Wallet
2. **Add BSC Network** (Chain ID: 56)
3. **Fund Wallet** with BNB (BEP-20)
4. **Connect to BFTSwap**
5. **Import Token:** Paste contract address
  - 0xFE4a9FAacbabac1883E0972fa2737a5D1B1c5601
6. **Swap BNB for NXS**
7. **Add to Wallet** to track balance

### Important Notes

- Set slippage to **6-7%** to account for tax
- Never share your private keys
- Only use official links and contract address
- Compare prices across both DEXs for best execution
- Use a referral code when buying to earn BNB rewards on future purchases
- **No minimum to stake — start earning with any amount of NXS**

---

## 11. Disclaimer

**Cryptocurrency investments carry significant risk.** The value of NXS may fluctuate, and past performance does not guarantee future results. Always conduct your own research (DYOR) before investing. Never invest more than you can afford to lose.

Nexustone is a community-driven project. The development team is committed to transparency and long-term growth, but cannot guarantee specific price outcomes.

**Lock Schedule Notice:** Team allocations are subject to time-locked vesting as detailed in Section 3.3. Investors should review the unlock schedule carefully before making investment decisions.

---

## 12. Conclusion

Nexustone represents a new paradigm in token design — one where investor protection is not an afterthought, but the foundation. Through immutable trading, enforced buyback mechanisms, transparent tokenomics, a strategic dual-liquidity approach across PancakeSwap and BFTSwap with **45% total liquidity locked for 2 years via PinkSale**, and a revolutionary 5-level community reward system paying **ALL REWARDS IN BNB**, NXS creates an environment where holders can participate with confidence.

The multi-level referral system transforms every community member into a stakeholder, creating a viral growth engine that rewards network builders across 5 levels of expansion — all paid in **BNB for immediate liquidity, stable value, and zero sell pressure on the token**. Combined with the inclusive staking platform offering up to **30% APY** with a **flexible no-lock option** and **no minimum stake required**, Nexustone democratizes passive income opportunities for holders of all sizes.

With a carefully structured vesting schedule — **45% liquidity locked for 2 years via PinkSale**, **5% staking rewards unlocking at 3 months**, **20% exchange reserves unlocking at 6 months**, and **30% utility allocation unlocking at 12 months** — Nexustone demonstrates long-term commitment to sustainable growth and ecosystem development.

The future of decentralized finance belongs to projects that prioritize sustainability over speculation. Nexustone is built for the long term.

---
